ROCK Dunnage® Bags

**Protect Your Cargo Against
Transit Damage**

Rock Ltd.

www.rockdunnage.com

ROCK Dunnage

Reduce or eliminate cargo damage now using ROCK Dunnage Bags **minimising claims**, saving you money and increasing overall customer satisfaction.

By inserting **inflatable bags** in voids/spaces between your goods, the load can be braced, thus absorbing vibrations and collisions and effectively keeping the goods stable.

Our bags are manufactured using Woven Polypropylene and are completely Re-Usable if required.

Inflation and deflation take only minutes.

Load Securing

In the past, loads have been secured using pallets, lumber braces, cartons and the like which were neither effective, nor economical. Dunnage bags on the other hand, are the most **economical, fast and effective** means of securing your load in transit.

Whether you are shipping by Container, Truck, or Rail, you can depend on ROCK Dunnage to safely secure your cargo all the way to its destination.

Dunnage bags are available in a variety of sizes and specifications to withstand almost every conceivable application.

We can even design and manufacture non-standard sizes and specs. depending on your custom application and requirements.

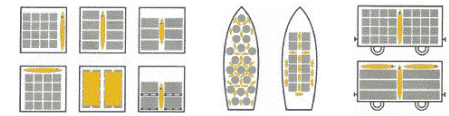

Benefits

- Our bags are made of Woven PP, and can thus expand and contract easily with changes in the surrounding tempertaure.
- Unlike paper dunnage bags, they are completely rain and water proof.
- The raw materials are 100% Recyclable virgin materials.
- They conform to the shape of the cargo.
- They can be reused and are durable.
- They are easy and quick to inflate, and deflate.
- They are the most economical void filling solution in the market today.
- We are an Export driven supplier with a fast

As Easy as 1-2-3

Containers, Trucks, Rail ...
